Configuration Changes: If you'd like to declare Spin (or non) or use a different sail/configuration, you may do so as long as it's included in your ratings certificate. You MUST announce this to the R/C (and receive confirmation) prior to the first Preparatory Signal.

To calculate your new start time: Take the difference between your handicap shown above and the new handicap and multiply by the Race Distance (in miles). That's your time offset from the time in the chart. Confirm this with the R/C.
